## EXPERIENCE

### INTEGRAL AD SCIENCE | TECHNICAL CLIENT ENGINEER

July 2021 - Present | Pune, India

- Technical in depth troubleshooting and optimization (**HTML, JavaScript and SQL**) for digital advertisement placements measurement technology. One of the best performers in the team which handled 30 percent of the global volume of the issues.
- Working with other team for more in-depth troubleshooting utilizing **Looker, SQL (Snowflake and Sequel Pro), AWS Athena, and Python**.
- Built and used **Python scripts** to analyse massive data sets from client and internal databases in order to determine the items generating discrepancies and issues. Turnaround time was reduced from 4-5 hours to 5 minutes per issue.
- Proactively engaged with Account Management teams and **collaborated effectively** with cross-functional teams.
- **Trained new team members** and **assisted** them in troubleshooting and resolving issues / tickets.

## PROJECTS

### AUTOMATED USER AND TEAM CREATION PROCESS | PYTHON, SELENIUM

- An UI automation which controls the browser and automate the process of creation of the user profiles and team profiles on the UI.
- Script takes the input from the excel file and insert the information into appropriate section on the web page. Saved at least 1 working hours per bulk user /team creation ticket.

### AUTOMATION OF TRAINING AND DEVELOPMENT PROCESS | HTML, CSS, JS, PHP, MYSQL

- Industrial project which helps an organization to create/manage/delete training and development events with the functionality of keeping track of attendance within the event.
- Created Login and SignUp functionality for Admin as well as normal user.
- Developed the dashboard of the project and implemented Google calendar API within the project in order to help admin create/delete events and send invite to the recipients.

## INTERNSHIPS

### SANKALPSOFT SOLUTIONS | FULLSTACK DEVELOPER

Jan 2021 – July 2021 | Nashik, India

- Optimized and created UI/UX designs for mini projects
- Helped Seniors in creating multiple webpages which reduced the project work by 20 percent
- Worked on the Front-end part of the major crowdfunding website project
- Got more exposure while working on technologies like Tailwind, ReactJS and MongoDB
